

Left-Side Gear Rack

The Gear Rack is a panel on the left side of the trailer designed for mounting a variety of exterior gear, including water containers, storage boxes, and other equipment you want to carry outside.

The rack features two horizontal mounting surfaces positioned on the same plane. Each surface has eight M8 threaded mounting points spaced 6 inches apart.

You can purchase mounting brackets from us or make your own using durable sheet materials such as plywood, plastic, or metal.

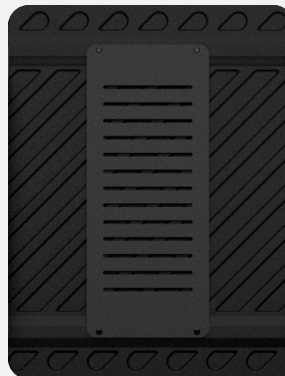

We offer different types of brackets for mounting gear

1

RotopaX Brackets

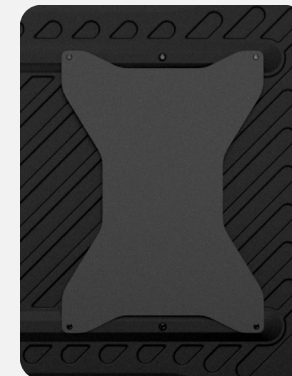

Designed specifically for RotopaX mounts

2

Pre-Slotted Brackets

Various styles with 1/4" or 3/8" mounting slot

3

Drill & Mount Bracket

Undrilled bracket for custom mounting
